Career Opportunities In CLOUD, DevOps & SRE

DevOps Consultant

Advises organizations on DevOps implementation for efficient software delivery.

DevOps Architect

Designs DevOps environments and automation solutions & define the tools, processes, and best practices

Software Developer

Designs and codes software applications to meet user needs.

Site-Reliability Engineer

Focus on ensuring the reliability and availability of software systems & use a combination of software engineering and operations skills.

Network Engineer

Manages and optimizes computer network infrastructure. They ensure data flows efficiently, securely.

DevOps Engineer

Automates and optimizes software development processes & work on configuring and maintaining CI/CD pipelines.

Release Manager

Coordinates software releases for smooth deployment & they work with development, testing, and operations teams.

System Administrator

Responsible for managing and maintaining an organization's IT infrastructure, including servers, networks, and software systems.

UpFlairs
...because winning takes it all

A Brief About **UPFLAIRS**

UpFlairs is an innovative **educational technology** company with a clear mission to elevate the skills and employability of students throughout India.

Our dedicated team is committed to fostering the next generation of tech talent, equipping them with cutting-edge skills in emerging technologies and has educated more than 47K students all over the globe including IITs, NITs, Deemed Universities and other colleges.

We offer the courses that are most trending technologies of the recent era in the fields like **AI/ML, Data Science, Cloud Computing, DevOps, Full Stack Web Development, Embedded Systems, IoT, and Robotics.** These courses are meticulously designed to provide students with the practical skills and knowledge required to excel in tech-driven careers, making them not just job-ready but industry leaders of tomorrow.

We are not only limited to training the youth of the country but also provide Lab setups to various Colleges and Universities and Project solutions to other companies for the domains like **AI-ML, IOT , ROBOTICS AND CLOUD**.

Who Should Go for This **CLOUD , DEVOPS & SRE?**

College Student

Start shaping your career right from college time by learning in-demand skills like DevOps & Cloud Engineering.

Graduate

Time for you to upskill, prepare yourself for a bright future, and kickstart a career in DevOps & Cloud.

College Dropout/Job Seeker

Not sure which career is right for you? Not finding any jobs? Learn DevOps & Cloud Engineering with us to land your first job.

Freelancer

Whether you are an existing freelancer or want to become one, LAMP is the most-rewarding skill for freelancers.

Looking to Switch Career

Not satisfied with your current job profile? Switch to DevOps & Cloud Engineering, an easy-to-learn, most impressive, and highly-paid skill.

...because winning takes it all

Why Learn CLOUD,DEVOPS & SRE With Upflairs Only?

Trusted by Learners

Our training and support system intrigue learners.

Expert Trainers

Professional Trainers having experience of delivering more than 30k students. We ensure the high quality training always aimed at career building.

Completely Practical-Oriented

We offer 100% practical training with regular assessment, assignment and projects.

Industry-Recognized Certification

The certificate received by the learners on course completion is valid nationally and internationally. You can easily share , add it to your resume and explore great opportunities.

Online & Offline Batches

You can upskill yourself from anywhere by joining our live training batches
Also we provide classroom training in Jaipur.

Career Assistance

We help you build a great career as a developer. Our team offers you career guidance, pepares you for interview, and assists you in finding job.

Hands-On Projects

You will get to work on multiple projects during the training so that you can gain some experience.

Comprehensive Curriculum

The course includes most comprehensive Curriculum, covering all breadths and depths in detail.

Project Titles

Final Project (4)

PART -1

1. ***"MYSQL Database replication with Login and Registration Form."***
2. ***"A multi tier microservices testing using docker compose"***

PART -2

1. ***"End to End deployment Automation Using Jenkins."***
2. ***"Using a Terraform , Create Two- Instances and Load Balancer"***

Project Major + Minor (14)

PART -1

1. ***Creating a command-line based chatting platform using netcat***
2. ***Sharing web application content with Apache httpd and NFS***
3. ***How Red Hat Enterprise Linux is getting used by IRCTC & LIC***
4. ***Deploying two tier application using amazon ELB***
5. ***Gathering logs in cloud watch for on prim and on cloud instances***
6. ***Setup a github architecture and collaborate with team member .***
7. ***Containerizing a GUI app like vs-code***
8. ***Accessing container portal with QR code***
9. ***Deploying a database replica using stateful-sets***

PART -2

10. ***Create IAM user using terraform***
11. ***Eks and aks deployment for real time application***
12. ***Terraform VPC design and ec2 planning***
13. ***Setup nginx for two exist instance***
14. ***Setup docker monitoring using datadog***

CLOUD , DEVOPS & SRE		
PART-1 Duration – 30 Days/ (60Hours)		
1	**Linux M1 (20 Hours)**	• Deep dive with Linux flavors • Installing Centos / Redhat • Basic command • The Environment • A Gentle Introduction to vi / vim / nano • Customizing the Prompt • Text Processing & IO • Tar extracting and compression • What Is the Shell? • Basic shell scripting • User management • Basic permission • Networking concept • DHCP & DNS • Firewalld • Creating partitions with XFS format • NFS, SSHFS • Growing partitions • SSH & RDP
	Mini Project	• ***Creating a command-line based chatting platform using netcat*** • ***Sharing web application content with Apache httpd and NFS*** • ***How Red Hat Enterprise Linux is getting used by IRCTC & LIC***
2	**Planning Business Applications M2 (20 Hours)**	• What is cloud computing • Types Of Cloud Computing • Cloud Computing Issues • Virtualization • Types of virtualization • Cloud Delivery Models • Features of Cloud Computing • Amazon Web Services (AWS) • Creating ec2 instances • Introduction to IAM services • Creating user groups and accounts using IAM • Creating permission boundary and policies • Deploying applications with apache httpd and nginx web servers • Elastic Ip's, ELB (Elastic Load Balancer) • Storage services - EBS • introduction to amazon RDS • Creating RDS free tier instances • Monitoring with cloud watch • Introduction to other monitoring tools

	Mini Project	• ***"Deploying two tier application using amazon ELB"*** • ***"Gathering logs in cloud watch for on prim and on cloud instances"***
3	**Containerization using Docker M4 (10 Hours)**	• Container History • Container runtime engines • Installation of docker on various platforms • Need of containers • Docker architecture understanding • Docker operations • Docker images and registry • Docker building with Dockerfile • Container basic operations • Python and java based containerization • Pushing image to docker registry • Pushing image to ECR and ACR • Docker networking • Docker webui demo using portainer • Docker compose demo and understanding
	Mini Project	• ***"Containerizing a GUI app like notepad"*** • ***"Accessing container portal with QR code"***
4	**Kubernetes M5 (10 Hours)**	• Introduction of kubernetes • Introduction to container orchestration engine • Setup k8s cluster using minikube & kubeadm • K8s client options • Pod concept • Pod details • Introduction to service • Nodeport service demo • Configmap demo • Intro to deployment • Javabase app deployment • Kubernetes secrets • Storage demo for local storage • K8s dashboard • App deployment using dashboard
	Mini Project	• ***"Deploying a database replica using stateful-sets"*** • ***"Eks and aks deployment for real time application"***
	Capstone project	• ***"MYSQL Database replication with Login and Registration Form."*** • ***"A multi-tier micro services testing using docker compose***

PART-2 Duration – 15 Days/ (30Hours)		
5	**SCM & VSC GIT/github M3 (2.5 Hours)**	• Introduction to Github • Creating repo and updating code
	Mini Project	• ***Setup a github architecture and collaborate with team member***
6	**Ansible & Terraform for Infrastructure Provisioning M6 (12.5 Hours)**	• Introduction • Terraform Setup • Terraform configuration and HCL • provisioning of AWS for ec2 resources • Understanding terraform state file • Terraform provider and versioning • Terraform variables and data types • Introduction to ansible • Difference b/w ansible and terraform • Lab- Setup VMs and Install Ansible • Ansible inventory • Introduction to YAML • Ansible Playbooks
	Mini Project	• ***"Business use cases for deployment of eks or aks"*** • ***"Terraform VPC design and ec2 planning"*** • ***"create a IAM user using terraform"***
7	**CICD – Jenkins DevOps M7 (10 Hours)**	• What is ci &cd • Need of the industry • Installing Jenkins • Understanding Jenkins • Creating jobs and connecting to technology • Docker & k8s connecting • Aws connection • Design entire pipeline
8	**Monitoring with Datadog M8 (2.5 Hours)**	• Creating datadog account • Integrations and alerts • Container and cloud monitoring • Kubernetes monitoring
	Mini Project	• ***Setup docker monioting with datadog***
	Capstone Project (2.5 Hours)	• ***"End to End Deployment Automation Using Jenkins."*** • ***"Using a Terraform, Create Two- Instances and Load Balancer"***
