Career Opportunities In Linux (Fundamentals of Cloud Computing)

DevOps Consultant

Advises organizations on DevOps implementation for efficient software delivery.

Software Developer

Designs and codes software applications to meet user needs.

Network Engineer

Manages and optimizes computer network infrastructure. They ensure data flows efficiently, securely.

Release Manager

Coordinates software releases for smooth deployment & they work with development, testing, and operations teams.

DevOps Architect

Designs DevOps environments and automation solutions & define the tools, processes, and best practices

Site-Reliability Engineer

Focus on ensuring the reliability and availability of software systems & use a combination of software engineering and operations skills.

DevOps Engineer

Automates and optimizes software development processes & work on configuring and maintaining CI/CD pipelines.

System Administrator

Responsible for managing and maintaining an organization's IT infrastructure, including servers, networks, and software systems.

A Brief About **UPFLAIRS**

UpFlairs is an innovative **educational technology** company with a clear mission to elevate the skills and employability of students throughout India.

Our dedicated team is committed to fostering the next generation of tech talent, equipping them with cutting-edge skills in emerging technologies and has educated more than 47K students all over the globe including IITs, NITs, Deemed Universities and other colleges.

We offer the courses that are most trending technologies of the recent era in the fields like **AI/ML, Data Science, Cloud Computing, DevOps, Full Stack Web Development, Embedded Systems, IoT, and Robotics.** These courses are meticulously designed to provide students with the practical skills and knowledge required to excel in tech-driven careers, making them not just job-ready but industry leaders of tomorrow.

We are not only limited to training the youth of the country but also provide Lab setups to various Colleges and Universities and Project solutions to other companies for the domains like **AI-ML, IOT , ROBOTICS AND CLOUD**.

Who Should Go for This Linux(Fundamentals of Cloud Computing) ?

College Student

Start shaping your career right from college time by learning in-demand skills like DevOps & Cloud Engineering.

Graduate

Time for you to upskill, prepare yourself for a bright future, and kickstart a career in DevOps & Cloud.

College Dropout/Job Seeker

Not sure which career is right for you? Not finding any jobs? Learn DevOps & Cloud Engineering with us to land your first job.

Freelancer

Whether you are an existing freelancer or want to become one, LAMP is the most-rewarding skill for freelancers.

Looking to Switch Career

Not satisfied with your current job profile? Switch to DevOps & Cloud Engineering, an easy-to-learn, most impressive, and highly-paid skill.

Why Learn Linux (Fundamentals of Cloud Computing) With Upflairs Only?

Trusted by Learners

Our training and support system intrigue learners.

Expert Trainers

Professional Trainers having experience of delivering more than 30k students. We ensure the high quality training always aimed at career building.

Completely Practical-Oriented

We offer 100% practical training with regular assessment, assignment and projects.

Industry-Recognized Certification

The certificate received by the learners on course completion is valid nationally and internationally. You can easily share , add it to your resume and explore great opportunities.

Online & Offline Batches

You can upskill yourself from anywhere by joining our live training batches Also we provide classroom training in Jaipur.

Career Assistance

We help you build a great career as a developer. Our team offers you career guidance, pepares you for interview, and assists you in finding job.

Hands-On Projects

You will get to work on multiple projects during the training so that you can gain some experience.

Comprehensive Curriculum

The course includes most comprehensive Curriculum, covering all breadths and depths in detail.

LINUX (Fundamentals of Cloud Computing)		
Duration – (30 Hours)		
1	**Introduction to Linux (2 Hours)**	• What is Linux • History and Philosophy of Linux • Key Features of Linux • Advantages of Using Linux • Comparing Linux to Other Operating Systems
2	**Installation (3 Hour)**	• Preparing for Installation • Hardware Requirements • Pre-installation Checks • Installing Linux Distributions • CentOS / Red Hat Installation • \Ubuntu Installation • Virtualization and VirtualBox • Virtualization Concepts • Installing and Configuring VirtualBox • Creating Virtual Machines
3	**Basic Linux Command (4 Hours)**	• Introduction to the Linux Terminal • Command-Line Interface (CLI) Basics • Navigating the Filesystem • Linux System Commands • Managing Processes • User and Group Management • System Information • System Utility Commands • Working with Dates and Times • Calculations with bc • Essential Commands (cal, which, uname, hostname) • Service Management with systemctl • Managing Services and Daemons • Process Management
4	**File System (3 Hours)**	• Exploring the Linux Filesystem • Directory Structure • Filesystem Hierarchy Standard (FHS) • Manipulating Files and Directories • Creating, Deleting, and Renaming • Copying and Moving • Permissions and Ownership • File and Directory Command • Viewing File Contents (cat, less) • Searching for Files (find, locate) • File Permissions and Attributes (chmod, chown)
5	**Shell Scripting (3 Hours)**	• List Introduction to Shell Scripting • Scripting Basics • Shell Scripting vs. Programming Languages • Writing Your First Shell Script

Contact: ***+919251 494002, +91 6350417917*** W: www.upflairs.com

		• Script Execution • Variables and Data Types • Conditional Statements and Loops • if, else, elif statements • for and while loops • Functions and Scripting Best Practices • Writing Reusable Code • Shell Scripting Best Practices
6	**Linux Networking (4 Hours)**	• Networking Basics • TCP/IP Fundamentals • Network Interfaces and Configuration • SSH and Remote Access • SSH Configuration • Securely Connecting to Remote Servers • DNS and DHCP • DNS Configuration • DHCP Setup • Web Server Installation and Configuration • Installing and Configuring Apache Web Server • Hosting a Simple Website • Web Server Security Best Practices
7	**Package Management (3 Hours)**	• Package Management Concepts • Package Managers Overview • Repositories and Package Sources • Managing Software with yum (CentOS/Red Hat) • Installing, Updating, and Removing Packages • Repository Configuration • Managing Software with apt (Ubuntu/Debian) • Package Management on Debian-based Systems • Managing Software Repositories
8	**Advanced File Management (2 Hours)**	• Advanced File Operations • File Linking and Symbolic Links • Archiving and Compression (tar, gzip, zip) • Filesystem Management with fstab • Understanding fstab and Mount Points • Managing Storage Devices • Disk Quotas • Implementing Disk Quotas • Monitoring and Managing Disk Usage
9	**Security and Permissions (3 Hours)**	• User and Group Management • Managing Users and Groups • User Account Security • File Permissions • Understanding File Permissions • Special Permissions (SUID, SGID, Sticky Bit)
	Capstone Project (3 Hours)	***Capstone 1:*** • **"System Monitoring Tool"**
