Career Opportunities In Linux (Fundamentals of Cloud Computing)

DevOps Consultant

Advises organizations on DevOps implementation for efficient software delivery.

Software Developer

Designs and codes software applications to meet user needs.

Network Engineer

Manages and optimizes computer network infrastructure. They ensure data flows efficiently, securely.

Release Manager

Coordinates software releases for smooth deployment & they work with development, testing, and operations teams.

DevOps Architect

Designs DevOps environments and automation solutions & define the tools, processes, and best practices

Site-Reliability Engineer

Focus on ensuring the reliability and availability of software systems & use a combination of software engineering and operations skills.

DevOps Engineer

Automates and optimizes software development processes & work on configuring and maintaining CI/CD pipelines.

System Administrator

Responsible for managing and maintaining an organization's IT infrastructure, including servers, networks, and software systems.

Who Should Go for This Linux(Fundamentals of Cloud Computing) ?

College Student

Start shaping your career right from college time by learning in-demand skills like DevOps & Cloud Engineering.

Graduate

Time for you to upskill, prepare yourself for a bright future, and kickstart a career in DevOps & Cloud.

College Dropout/Job Seeker

Not sure which career is right for you? Not finding any jobs? Learn DevOps & Cloud Engineering with us to land your first job.

Freelancer

Whether you are an existing freelancer or want to become one, LAMP is the most-rewarding skill for freelancers.

Looking to Switch Career

Not satisfied with your current job profile? Switch to DevOps & Cloud Engineering, an easy-to-learn, most impressive, and highly-paid skill.

Why Learn Linux (Fundamentals of Cloud Computing) With Upflairs Only?

Trusted by Learners

Our training and support system intrigue learners.

Expert Trainers

Professional Trainers having experience of delivering more than 30k students. We ensure the high quality training always aimed at career building.

Completely Practical-Oriented

We offer 100% practical training with regular assessment, assignment and projects.

Industry-Recognized Certification

The certificate received by the learners on course completion is valid nationally and internationally. You can easily share , add it to your resume and explore great opportunities.

Online & Offline Batches

You can upskill yourself from anywhere by joining our live training batches
Also we provide classroom training in Jaipur.

Career Assistance

We help you build a great career as a developer. Our team offers you career guidance, pepares you for interview, and assists you in finding job.

Hands-On Projects

You will get to work on multiple projects during the training so that you can gain some experience.

Comprehensive Curriculum

The course includes most comprehensive Curriculum, covering all breadths and depths in detail.

LINUX (Fundamentals of Cloud Computing)		
Duration – 2 Weeks (24 Hours)		
1	**Introduction (2 Hours)**	• Deep dive with Linux flavours • What is linux? • Why linux?
2	**Installation (2 Hours)**	• Installing Centos / Redhat / Ubuntu • Virtualization • Virtual box
3	**Basic Commands (1.5 Hours)**	• What is commands • Linux system commands • a. System Utility Commands in Linux (date, uptime, hostname, uname, which, cal, bc) • systemctl command • ps command
4	**File System (2 Hours)**	• Exploring the System • Manipulating Files and Directories • Working with Commands • Advanced Keyboard Tricks
	Mini Project	***Project 1: "Create a Directory structure and practice cp mv Commands"***
5	**Variables (1 Hour)**	• The Environment • Shell variable • Special variable ($0 ,$$,$?) • Customizing the Prompt
	Mini Project	***Project 2: "Create calculator , Create User"***
6	**Creating , Viewing & Editing Text Files (1 Hours)**	• A Gentle Introduction to vi , vim ,nano
7	**Input Output Redirection (2 Hours)**	• Standard input , standard output and standard error • Redirecting Output to a file or Program • Constructing pipelines
	Mini Project	***Project 3: "Make a file withing 3-7 lines of ifconfig commands & merge multiple files in to another files."***
8	**Archiving and Backup (1 hours)**	• Managing Compressed Tar Archives • Extracting files of an archive • Create a compressed file

Contact: ***+919251 494002, +91 6350417917*** W: www.upflairs.com

9	**Users and groups (2 hours)**	• User and Group Concepts • Gaining superuser access • Manage local users • Manage local Groups
10	**PERMISSION (1.5 hours)**	• Basic permission • Octal of basic permission • Access control list
11	**SHELL (2 hours)**	• What Is the Shell? • Seeing the World as the Shell Sees It • Shell deep dive • Writing First Script
12	**STORAGE (2 hours)**	• Storage and partition using GPT and MBR
13	**NETWORKING (2 hours)**	• Networking concept i • DHCP & DNS • SSH & RDP
	Capstone Project (2 hours)	***Capstone Project :*** ***- Automate tasks using Shell Scripting*** ***- Monitor processes and system performance using Linux tools.*** ***- Create a backup and restore mechanism using tar and compressed archives.***
